PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in software development, data analytics, data structures and algorithms, and database management. Experienced in building end-to-end academic and personal projects covering data cleaning, model building, and database integration. Adaptable quick learner with strong analytical and communication skills, seeking to contribute to the role.

TECHNICAL SKILLS

Programming Languages: Java, Apex
Core CS Concepts: Object-Oriented Programming (OOP), Database Management Systems (DBMS), ETL Concepts, SDLC (Software Development Life Cycle), Data Structure and Algorithm (DSA)
Databases: MySQL, MySQL Workbench, PostgreSQL, pgAdmin
Data Analytics & Visualization: Microsoft Excel, Microsoft Power BI, Tableau desktop, Data Analytics, Data Visualization
CRM / Cloud: Salesforce, Cloud Computing Fundamentals
Tools & IDEs: Git, GitHub, Visual Studio Code (VS Code), IntelliJ IDEA, Postman
Soft Skills: Teamwork, Communication, Adaptability, Agile & Flexible, Quick Learner

EDUCATION

Kalinga Institute of Industrial Technology **2022 - 2026**
Bachelor of Technology in Computer Science, Bhubaneswar, India

Dr GL Dutta DAV Public School **2020 - 2022**
Senior Secondary Education, Patna, India

PROJECTS

Student Performance Tracker | Salesforce CRM Application **08/2026 - 09/2026**
Salesforce, Apex, Lightning Web Components (LWC), SOQL, SOSL, Custom Objects, Apex Triggers, SLDS, Salesforce CLI (SFDX)

- Developed a Salesforce application using custom objects and object relationships to manage student profiles, course enrollments, grades, and academic performance.
- Implemented Apex classes and triggers to automatically calculate and update student GPA when enrollment records or grades are inserted or modified.
- Designed SOQL queries and Apex methods to retrieve student records, filter high-performing students, and display academic performance data efficiently.
- Built interactive Lightning Web Components (LWC) integrated with Apex and styled using Salesforce Lightning Design System (SLDS) to provide a user-friendly academic performance dashboard.

FlowStock ERP | Full-Stack Enterprise Management System **06/2026 - 07/2026**
B-crypt, JWT Auth, Typescript, Prisma ORM, AI Assisted Development

- Directed the end-to-end design of a full-stack ERP application for inventory and business management, using AI-assisted development for the frontend (React, TypeScript, Tailwind CSS) and backend (Node.js, Express.js).
- Designed a relational MySQL schema and data access layer using Prisma ORM to manage inventory records, transactions, and business entities with referential integrity.
- Specified secure JWT-based authentication and authorization to control access across user roles and protect API endpoints.
- Defined the RESTful API structure connecting the Express.js backend to the React frontend for real-time inventory tracking, order management, and stock-level reporting.

Movie Recommendation System | Java, K-Nearest Neighbors (KNN), MySQL **01/2025 - 02/2025**

- Developed a KNN-based recommendation system using a dataset of over 5,000 movies, improving recommendation relevance through collaborative filtering.
- Performed data cleaning, feature extraction, and exploratory data analysis (EDA) on movie datasets, then integrated a MySQL database for user preference storage and recommendation retrieval.
- Improved personalized recommendation accuracy through similarity-based filtering techniques.

CERTIFICATIONS

- Java (Basic) Certification — HackerRank
- SQL (Intermediate) Certification — HackerRank
- Salesforce Developer Batch - Trailhead
